**trytond***\_account\_fr\_chorusDocumentation*

***Release latest***

**May 03, 2021**

---

## Contents

---

**1 Configuration**

**3**

The `account_fr_chorus` module allows to send invoices through the [Chorus Pro](#) portal.

If the party is checked for Chorus Pro, all posted customer invoices are queued to be sent. A cron job will send them every 15 minutes by default using the credential from the accounting configuration.

# CHAPTER 1

---

## Configuration

---

The `account_fr_chorus` module uses the section `account_fr_chorus` to retrieve the path of the SSL certificates.

- *certificate*: the path to the SSL certificate.
- *privatekey*: the path to the SSL private key.

**Warning:** The private key must be unencrypted.
