2.4	Version 6.2.0 - 2021-11-01 . . . . .	5

The *Account Stock Shipment Cost Module* allocates shipment cost based on invoice.

The *Account Stock Shipment Cost Module* extends and introduces the following concepts:

## 1.1 Product

When the *Account Stock Shipment Cost Module* is activated, products gain some extra properties. This includes a new check-box “Shipment Cost” which is used to indicate that the service is used as the cost for [Shipments](#).

**See also:**

The [Product](#) concept is introduced by the [Product Module](#).

## 1.2 Shipment Cost

*Shipment Costs* define which posted supplier [Invoice](#) lines are linked to which [Shipments](#). When the *Shipment Cost* is posted, the costs from the shipments are added up and then split up and reallocated to the shipments.

**See also:**

Shipment Costs can be found by opening the main menu item:

*Financial → Invoices → Shipment Costs*
