1 Bank .......................................................... 3
2 Bank Account .................................................. 5
The bank module defines the concept of bank and account.
A bank links a party with a BIC.
A bank account is defined by a Bank and at least one number.

- The **Bank** is the bank where the account is set.
- The **Owners** are the parties who own the account.
- The **Currency** is the default currency of the account.
- The **Numbers** are the different possible number that identifies the account. There are two types defined by default:
  - IBAN
  - Other
