The bank module defines the concept of bank and account.
A bank links a party with a BIC.
BANK ACCOUNT

A bank account is defined by a Bank and at least one number.

- The Bank is the bank where the account is set.
- The Owners are the parties who own the account.
- The Currency is the default currency of the account.
- The Numbers are the different possible number that identifies the account. There are two types defined by default:
  - IBAN
  - Other
