3.3	Version 6.2.0 - 2021-11-01 .....	7

The *Currency RO Module* adds the [Romanian National Bank](#) as a source for currency exchange rates.

## CONFIGURATION

The *Currency RO Module* uses values from settings in the [currency\_ro] section of the [configuration file](#).

### 1.1 `requests_timeout``

The `requests_timeout` defines the time in seconds the module is waiting for a response from the Romanian National Bank service.

The default value is: ``300``.

The *Currency RO Module* extends some existing concepts.

## 2.1 Scheduled Rate Updates

When the *Currency RO Module* is activated, the [Romanian National Bank](#) is added as source. If it is selected then only the Romanian Leu can be used as a base currency.

**See also:**

The [Scheduled Rate Updates](#) concept is introduced by the [Currency Module](#).
