**Jul 29, 2023**

## CONTENTS

|          |                   |          |
|----------|-------------------|----------|
| <b>1</b> | <b>Tarif Code</b> | <b>3</b> |
| <b>2</b> | <b>Duty Rate</b>  | <b>5</b> |

The customs module allows to define customs duty based on the tariff code.

## TARIF CODE

It stores the [Harmonized System](#) that can be set on *Product*.

- The *Code* from the HS.
- The *Country* in case of a country specific code.
- The *Organization* in case of a country organization code.
- The *Start / End* period of the year for which the code is valid.

## DUTY RATE

It stores the rate of a *Tarif Code* for a country over a period.

- The *Tariff Code*.
- The *Country* for which the rate is.
- The *Organization* for which the rate is.
- The *Type: Import or Export*
- The *Start* and *End* date of validity.
- **The Computation Type:**
  - *Amount*: fixed amount with currency.
  - *Quantity*: amount (in currency) per unit of measure.
