
trytond_notification_email

Release 6.8

unknown

Jul 29, 2023

CONTENTS

1 Configuration

3

The notification email module allows to define email templates which will be sent to a list of recipients when a trigger is fired on a record event. Extra reports from the same record can be attached to the email.

CONFIGURATION

The `notification_email` module uses parameters from the section:

- `[notification_email]`:
 - `from`: The default `From` for the email.
