Release 6.2

unknown

Feb 16, 2022

CONTENTS

- 1 Design** **3**
- 1.1 Party 3
- 1.2 Purchase 3

The *Purchase Price List Module* allows price lists to be defined for suppliers.

The *Purchase Price List Module* extends the following concepts:

1.1 Party

When the *Purchase Price List Module* is activated, Price List can also be defined for use with purchases from the party.

See also:

The [Party](#) concept is introduced by the module [Party Module](#).

1.2 Purchase

When the *Purchase Price List Module* is activated, the unit price of a product is calculated using the Price List if one is defined for the supplier and if the Product does not have a Product Supplier Price.

See also:

The [Purchase](#) concept is introduced by the module [Purchase Module](#).
