CONTENTS

The sale_shipment_cost module adds shipment cost for sale.

Two new fields are added to *Sale* and *Sale Configuration*:

- *Carrier*: The carrier used for the sale.
- *Shipment Cost Method*: The method used to compute the cost.
 - *On Order*: The cost will be invoiced once for the sale.
 - *On Shipment*: The cost will be invoiced for each shipments.
 - *None*: The cost will not be invoiced to the customer but added to the outgoing moves cost.

At the quotation if a carrier is selected a new line is appended with the shipment cost but the added line can be modified when going back to draft.
