**1 Drop Shipment**

**3**

The Sale Supply Drop Shipment module adds a drop shipment option on product supplier if “supply on request” is checked. When checked, the purchase request and the linked purchase have the address of customer as Delivery Address; at the confirmation of the purchase a drop shipment is created and linked to both the purchase and the sale.

# CHAPTER 1

---

## Drop Shipment

---

A drop shipment is used when products are sent directly from the supplier to the customer without going through the warehouse. It is mainly composed of a supplier, a customer and a list of moves.

The drop shipment can be in one of this states:

- Draft  
All moves are in draft.
- Waiting  
All moves are in draft, the synchronization between the moves of the supplier and the moves to the customer has occurred.
- Shipped  
All moves from the supplier are done.
- Done  
All moves are in state Done.
- Cancel  
All moves are cancelled.
