<b>2 Design</b>	<b>5</b>
2.1 Stock Quantity Issue . . . . .	5

The *Stock Quantity Issue Module* helps to solve stock quantity issues.

## **1.1 Generate stock quantity issues**

You can define a Scheduled Action to generate the *Stock Quantity Issues* periodically like the *Generate Stock Quantity Issues* wizard does.

The *Stock Quantity Issue Module* introduces the following concepts:

## 2.1 Stock Quantity Issue

*Quantity Issues* are generated by a Scheduled Task. They represent planning issues regarding the quantity of stock available for future *Shipments* or *Productions*.

A best planned date is calculated for each issue. Applying this date updates the shipment's, or production's, planned date. The issue also lists the *Products* for which there is a quantity issue.

The *Employee* who processes or solves the issue is recorded.

**See also:**

Quantity Issues can be found by opening the main menu item:

*Inventory & Stock* → *Quantity Issues*

### 2.1.1 Wizards

#### Generate Stock Quantity Issues

The *Generate Stock Quantity Issues* wizard creates for each warehouse the *Stock Quantity Issues* if there are any. When running it deletes any open issues, updates the processing issues with the new products and creates new issues.

**See also:**

The wizard can be launched by opening:

*Inventory & Stock* → *Quantity Issues* → *Generate Stock Quantity Issues*
