1 Vue StoreFront Configuration

3

The `web_shop_vue_storefront` module provides the back-end to integrate with [Vue Storefront 1.x](#).

Vue StoreFront Configuration

The endpoint must be updated to use the Tryton URL. You must just replace */api* by *http(s)://<hostname>:<port>/<database name>/web_shop_vue_storefront/<shop name>*.

The configuration *autoRefreshTokens* must be set to *false*.
